SUMMARY

Computer Science undergraduate and Full-Stack Developer specializing in the MERN stack. Experienced in building scalable web applications, RESTful APIs, and modern frontend systems using Next.js, TypeScript, and Node.js. Strong foundation in Data Structures, System Design, and Backend Architecture. Passionate about performance optimization and delivering production-grade software.

EDUCATION

Parul University

Bachelor of Technology in Computer Science and Engineering

2023-2027

CGPA: 7.00 / 10

EXPERIENCE

- Developed and maintained 2+ Full-stack web applications using Angular, Node.js, MySQL, and MongoDB.
- Managed source code using Git and GitHub, performed API testing with Postman, and resolved application issues through systematic debugging.

TECHNICAL PROJECTS

SafeAura – Women Safety Application

- Created a Flutter-based Android application with SOS alert functionality, GPS tracking, and emergency contact notifications.
- Integrated Firebase Authentication and Firestore to securely manage user accounts and emergency contact information.
- Implemented shake-detection functionality to trigger emergency alerts and share live location during critical situations.
- Tools:** Flutter, Dart, Firebase, GPS API

PulseCare – AI-Powered Hospital Management System

- Developed PulseCare HMS, a full-stack hospital management system using React, Node.js, Express, and MongoDB to streamline healthcare operations.
- Implemented secure JWT-based authentication, role-based access control, and protected dashboards for patients and doctors.
- Built RESTful APIs for user management, appointment scheduling, patient records, and healthcare workflow automation.
- Designed a responsive React frontend with dynamic routing, state management, and role-specific interfaces to enhance user experience.

VibeConnect – Creator-Brand Collaboration Platform

- Developed a full-stack creator-brand collaboration platform using React, TypeScript, Node.js, and Express.
- Implemented secure authentication, role-based access control, and personalized dashboards for creators and brands.
- Built campaign discovery, media kit management, and analytics features to streamline collaboration workflows.
- Integrated AI-powered assistance and optimized frontend performance using Vite, enhancing user engagement and responsiveness.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS

Frameworks & Technologies: Angular, Node.js, Express.js, REST APIs, JWT Authentication

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Postman, VS Code, Android Studio

Core Concepts: Data Structures, Algorithms, Software Engineering, OOP, DBMS, Operating Systems, Problem-Solving

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ problems on LeetCode covering Arrays, Strings, Recursion, Dynamic Programming, Trees, and Graphs.
- Earned a 4-Star Java Badge on HackerRank.
- Successfully completed the **NPTEL IIT Madras** course *Computer Networks and Internet Protocols* (Jan–Apr 2025), a 12-week program, with a score of **62/100**.
- Secured **3rd Rank** in Poster Presentation at **ICSUMMIT 2026** for presenting *SafeAura: A Shake-Activated Intelligent Personal Safety System for Women*.
